On behalf of the Scientific Organizing Committee, it is my pleasure to inform you about the **8th International Calicivirus Conference** to be held in Rotterdam, The Netherlands from 7 – 11 May 2023.

Rotterdam is famous for its diversity and amazing architecture which connects modernity with cosmopolitan ambience. The conference will be held in the World Trade Center, which is located in the vibrant city center.

SAVE THE DATE

Sunday 7 – Thursday 11 May 2023

The registration and abstract submission will be opened soon. The abstract submission will remain open until the 13th of January.

The conference is aimed to encourage interaction and open discussions, with a view to developing new collaborations and fostering new research ideas. Experts in the calicivirus field will be invited to share the latest information on their research by state-of-the-art lectures, whilst oral session presentations will bring the delegates up-to-date in all aspects of calicivirus research.

We anticipate that a limited number of travel fellowships will become available to promote participation of researchers from middle and low-income countries.

I look forward to welcoming you in Rotterdam in May 2023 for a wonderful scientific meeting and hope that you will have a great time at the conference, and enjoy Rotterdam and its amazing sites.

We hope that we have encouraged you to register for this conference.

If you have any questions in the meantime, please do not hesitate to contact us via:
